SKILLS

- Javascript, Angular, Vue.js React, React, Node.js)
- Cloud Computing (Firebase, AWS, Azure)
- Version Control (Git, GitLab, BitBucket, Azure Devops)
- Back End Development
- LAMP Stack (Linux, Apache, MySQL, Python)
- .NET Stack (C#, ASP.NET, .NET Framework)
- Front End Development

CERTIFICATES

- Responsive Web Design
- Front End Development Libraries
- API Design
- Full Stack Web Developer
- Google Analytics Individual Qualification
- Web Development
- Add Authentication to your Web Apps using IBM Cloud App ID
- Fundamentals of Digital Marketing
- Google Playstore Listing Certificate
- JavaScript

I am a highly skilled software developer and engineer with a strong background in building modern, scalable web platforms and cross-platform mobile applications. My expertise lies in full-stack development, system design, and product engineering, with a practical focus on delivering reliable, high-performance solutions.

I have extensive hands-on experience in JavaScript ecosystems and modern frameworks, including React, TypeScript, React Native, Node.js, and Next.js. I build production-ready systems using cloud-native tooling, RESTful APIs, databases, and authentication layers, and I am comfortable owning features from architecture through deployment.

My earlier career in multi-disciplinary visual design gives me a strong product and UX intuition, allowing me to engineer systems that are not only technically sound but also intuitive, efficient, and user-focused. This background enables me to collaborate effectively with designers and product teams while maintaining an engineering-led approach.

EDUCATION

Artificial Intelligence with Python, Harvard X

Introduction to Computer Science, Harvard X

Front End Development Libraries, Free Code Camp

JavaScript Algorithms and Data Structures, Free Code Camp

Scientific Computing with Python, Free Code Camp

PROFESSIONAL EXPERIENCE

2023 January – present
Swindon, United Kingdom

Fluff Software, **Senior Software Developer**

As a Senior Full Stack Software Developer at Fluff.software, I am dedicated to delivering cutting-edge solutions that address complex challenges and exceed expectations.

With a strong focus on innovation, collaboration, and adaptability, I leverage my technical expertise to design and implement impactful applications that drive business success.

My approach emphasizes continuous improvement, both in the quality of the solutions I build and in fostering a culture of learning and growth within the team.

Core Proficiencies

With a well-rounded and extensive skill set, I bring a wealth of experience in full stack development, cloud computing, and team collaboration to every project:

Frontend Development

- Proficient in modern frameworks and libraries, including **JavaScript, Angular, React.js**, **React Native**, **Next.js**, and **Vue.js**
- Expertise in **JavaScript** (Vanilla JavaScript), **HTML**, **CSS**, and **Tailwind CSS** for building responsive and dynamic user interfaces
- Skilled in **Responsive UI/UX Design** to deliver seamless, user-friendly experiences across devices

Backend Development

- Extensive experience in building and maintaining **RESTful APIs**
- Proficient in integrating backend services with tools like **AWS API Gateway**, **Open Search**, **GraphQL** and **RabbitMQ**
- Expertise in containerization and orchestration using **Docker**

Cloud & DevOps

- Hands-on experience with **AWS Console**, **AWS Amplify**, **AWS Cognito**, and other cloud solutions
- Skilled in serverless architecture and real-time databases like **Firebase**
- Strong focus on scalable, secure, and reliable cloud deployments

Tooling & Collaboration

- Proficient in development tools such as **Visual Studio Code, Cursor** and API testing with **Postman**
- Experienced in project management and team communication using **Jira**, **Slack**, **Confluence**, **Notion**, and **Gather**
- Version control expertise with **GitHub** and **Git**, and time management tools like **Clockify**

Testing & Debugging

- Adept at troubleshooting and resolving complex issues through **Bug Chasing**
- Proficient in mobile app testing using **Android Studio**

Approach to Development and Leadership

I am committed to delivering solutions that not only meet technical requirements but also align with business objectives and user needs. My approach emphasizes:

- **Collaboration:** Encouraging open communication and teamwork to achieve project goals efficiently.
- **Continuous Learning:** Staying updated with the latest technologies and best practices to maintain a competitive edge.
- **Mentorship:** Providing guidance and sharing knowledge to enhance the team's collective expertise.
- **Quality Focus:** Prioritizing robust, scalable, and maintainable code to ensure long-term success.

By combining technical excellence with a focus on team dynamics, I strive to build solutions that make a meaningful impact and foster an environment where everyone can thrive.

2021 February – 2023 January
Johannesburg, South Africa

GotBot, **Intermediate Software Developer**

Mentoring and training junior developers is a core aspect of my role. I am deeply committed to guiding the next generation of developers, sharing knowledge, and fostering a culture of innovation and continuous learning within the team.

By empowering others, I contribute to the growth of both individuals and the organization as a whole.

In addition to my mentorship capabilities, my expertise spans a comprehensive array of skills, particularly in software and chatbot development, reflecting my versatility and depth in the tech domain:

Development Skills:

- **Programming Languages & Frameworks:** Proficient in JavaScript (Vanilla JavaScript), React.js, Angular, React Native, Next.js, Vue.js, HTML, CSS, and Tailwind.css. My experience includes building interactive and user-friendly applications across web and mobile platforms.

- **Chatbot Development:** Extensive experience in developing conversational AI solutions using tools such as **Google DialogFlow**, **ChatGPT**, and **Google Bard**. Skilled in designing natural language processing workflows, integrating chatbots with APIs, and enhancing user engagement through intelligent automation.

- **Cloud & DevOps:** Skilled in AWS services, including AWS Console, AWS API Gateway, and AWS K9S. Experienced in containerization with Docker and working with distributed systems such as OpenSearch and RabbitMQ.

- **API Development:** Expertise in building and consuming RESTful APIs to enable seamless communication between systems.

- **Tools & Platforms:** Proficient in using Android Studio, Visual Studio Code and Postman. Familiar with GitHub and Git for version control.

- **Collaboration & Project Management:** Strong background in tools like Jira, Slack, Confluence and Infobip for team collaboration and task management.

- **Data Management & State Handling:** Experience with Firebase and Redux for efficient data storage and state management in applications.

- **Bug Tracking & Quality Assurance:** Adept at identifying and resolving bugs to ensure robust software solutions.

With this broad skill set, I not only contribute to developing cutting-edge software and chatbot solutions but also ensure their scalability, efficiency, and alignment with user needs.

My passion for innovation and teamwork drives me to continuously enhance my capabilities and empower those I work with.

2018 January – 2021 February

Digileads, **Front End Web Developer**

In my role, I took on a diverse range of responsibilities that required proficiency in various skills.

These included:

Web Design & WordPress Development:

HTML & CSS:

Graphic/Digital Design:

UI & UX Design:

Server Work (cPanel & KonsoleH):

My skill set encompassed a wide array of competencies:

Graphic Design, Cascading Style Sheets (CSS), WordPress, HTML, Visual Design, Motion Graphics, Microsoft Excel, User Interface Design, Email Marketing, HTML Emails, ActiveCampaign, Jira, Elementor, Git, Github, JavaScript

PROJECTS

2024 – present

Nusuru, Cross Platform Mobile App
Nusuru is a cross-platform mobile application built with React Native and Expo, designed to connect users, service providers, and sellers in a marketplace environment. The app leverages Supabase for backend services, including authentication, real-time data, and notifications.

You can download the android app here

Key Features:
Secure authentication and user management (with Supabase Auth)
Real-time analytics
Push notification management and notification templates
Product, service, and provider management
UI with React, TailwindCSS
Custom API endpoints and Supabase Edge Functions

2025 May – 2025 May

Time To Price, Cross Platform Mobile App
A modern, cross-platform agricultural cost calculation and market monitoring app built with React Native and Expo. The app helps users calculate break-even prices, track market prices, set price alerts, and manage their farming business more efficiently.

You can download the android mobile app here

You can read the documentation here

Key Features:
Shortcuts: Quick access to key features like new & past calcs, market prices & analysis.
Cost Calc: Enter costs & yields to get break-even & profit prices per ton.
Market Prices: Live commodity prices & trends.

Price Alerts: Set alerts & get notified when prices hit your targets.
Past Calcs: View & manage your calculation history.
Cost Analysis: Gain insights into your farm's costs.
Notifications: In-app & push alerts for price and system updates.
Settings: Manage notifications, switch 🇬🇧/🇿🇦 language, and account options.
Help & FAQ: Quick access to support and common questions.
Languages: English & Afrikaans supported — more coming!
Modern UI: Clean, mobile-first design with custom components.

2025 January – 2025 May

James Bond, Spy Web App
James Bond must send out a ping via a secure web application. These pings represent messages with coordinate data and can only be viewed by the user who sent them and administrators. James may respond to an existing ping with another, forming a trail of related pings. This was done with React.js, Typescript, Vite, Tailwind and Prisma

2025 October – Present

Trevnoctilla
Trevnoctilla is a fast, secure, and completely free online PDF editor that makes managing your PDF documents effortless. Whether you need to edit text, annotate, merge, split, compress, or convert PDFs, Trevnoctilla has you covered—all directly in your browser, with no downloads, installations, or sign-ups required.

Designed for students, professionals, and anyone handling PDFs, Trevnoctilla streamlines your workflow with a clean, intuitive interface.

You can:

- Edit PDFs online: Change text, images, and formatting quickly.
- Merge and split documents: Combine multiple PDFs into one or extract specific pages.
- Compress PDFs: Reduce file sizes without losing quality for faster sharing.
- Annotate and highlight: Add notes, highlights, and shapes to collaborate easily.
- Secure and private: All operations are performed in-browser, keeping your files safe.

Trevnoctilla works on any device—desktop, tablet, or mobile—making it perfect for people on the go. Whether you're preparing reports, signing contracts, or sharing study materials, Trevnoctilla is the simple, reliable, and free PDF solution you've been looking for.
