SKILLS

- MERN Stack (MongoDB, Express, React, Node.js)
- Cloud Computing (Firebase, AWS, Azure)
- Version Control (Git, GitLab, BitBucket, Azure Devops)
- Back End Development
- LAMP Stack (Linux, Apache, MySQL, Python)
- .NET Stack (C#, ASP.NET, .NET Framework)
- Front End Development

CERTIFICATES

- Responsive Web Design
- Front End Development Libraries
- API Design
- Full Stack Web Developer
- Google Analytics Individual Qualification
- Web Development
- Add Authentication to your Web Apps using IBM Cloud App ID
- Fundamentals of Digital Marketing
- Google Playstore Listing Certificate
- JavaScript

Hi

My name is Ignatius Mutizwa and thank you for making time to go through my CV.

Over the last few years, I've designed, developed, and maintained full-stack web and mobile applications, secure authentication systems, chatbots, internal tools, and scalable infrastructure — often taking features from idea to production.

My focus is always on building clean, efficient, scalable, maintainable and impactful systems that solve real problems, streamline workflows, and deliver meaningful results for users and teams.

Here's what that has looked like in practice

✅ Reduced content deployment time by 85%

Built custom CMS dashboards that empowered content editors to publish independently — freeing up 10+ dev hours per week.

⚡ Improved mobile performance by 38%

Optimized frontend rendering and API calls for high-traffic mobile platforms, serving thousands of users with minimal downtime.

🔐 Secured 10K+ users with zero post-launch incidents

Integrated OAuth, JWT, NextAuth, Supabase Auth, and Firebase Auth — with refresh token flows, secure route protection, MFA, and RBAC.

🤖 Automated 70% of customer support traffic

Designed and deployed NLP-driven chatbots using DialogFlow, Javascript, GoLang, Vue.js, Python and Infobip, reaching 95%+ intent match accuracy in production.

🚀 Streamlined CI/CD across teams

Used GitHub Actions, Bitbucket Pipelines, and Vercel to automate testing, builds, and deploys. Enabled safe rollbacks, branch previews, and 99.98% uptime.

🧠 Built data-driven dashboards

Surface real-time insights by connecting OpenSearch and custom APIs to clean, intuitive dashboards — improving error tracking and decision-making.

🎯 Accelerated onboarding by 40%

Standardized tooling with GitHub Codespaces, CodeSandbox, and pre-built API templates. Refactored legacy repos and improved internal documentation.

🛠️ Skills & Tools

Frontend & Mobile

React · Next.js · React Native · Vue.js · Tailwind CSS · HTML · CSS · JavaScript · TypeScript
Shadcn/UI · Ant Design · Bootstrap · WordPress (Custom & Headless) · Figma · Framer Motion · Styled Components
Expo · Redux · Zustand · Context API

Backend & APIs

Node.js · Python · Go · Flask · Django · Express · SQL ·
REST · GraphQL · Prisma · JSON handling · Supabase · Firebase · Postgres · MongoDB

Authentication & Security

JWT · OAuth · Supabase Auth · Firebase Auth · AWS Cognito · NextAuth · Refresh Tokens
Secure Route Protection · Role-Based Access Control (RBAC) · Multi-Factor Authentication (MFA)

Infrastructure & DevOps

AWS · Docker · Kubernetes · K9S · OpenSearch · RabbitMQ
CI/CD: GitHub Actions · Bitbucket Pipelines · GitLab CI · Vercel · Netlify
Version Control: GitHub · GitLab · Bitbucket
Dev Environments: GitHub Codespaces · CodeSandbox

EDUCATION

Artificial Intelligence with Python, Harvard X

Introduction to Computer Science, Harvard X

Front End Development Libraries, Free Code Camp

JavaScript Algorithms and Data Structures, Free Code Camp

Scientific Computing with Python, Free Code Camp

PROFESSIONAL EXPERIENCE

2023 January – present
Swindon, United Kingdom

Fluff Software, Senior Software Developer

As a Senior Full Stack Software Developer at Fluff.software , I am dedicated to delivering cutting-edge solutions that address complex challenges and exceed expectations.

With a strong focus on innovation, collaboration, and adaptability, I leverage my technical expertise to design and implement impactful applications that drive business success.

My approach emphasizes continuous improvement, both in the quality of the solutions I build and in fostering a culture of learning and growth within the team.

Core Proficiencies

With a well-rounded and extensive skill set, I bring a wealth of experience in full stack development, cloud computing, and team collaboration to every project:

Frontend Development

- Proficient in modern frameworks and libraries, including **React.js**, **React Native**, **Next.js**, and **Vue.js**
- Expertise in **JavaScript** (Vanilla JavaScript), **HTML**, **CSS**, and **Tailwind CSS** for building responsive and dynamic user interfaces
- Skilled in **Responsive UI/UX Design** to deliver seamless, user-friendly experiences across devices

Backend Development

- Extensive experience in building and maintaining **RESTful APIs**
- Proficient in integrating backend services with tools like **AWS API Gateway**, **Open Search**, **GraphQL** and **RabbitMQ**
- Expertise in containerization and orchestration using **Docker**

Cloud & DevOps

- Hands-on experience with **AWS Console**, **AWS Amplify**, **AWS Cognito**, and other cloud solutions
- Skilled in serverless architecture and real-time databases like **Firebase**
- Strong focus on scalable, secure, and reliable cloud deployments

Tooling & Collaboration

- Proficient in development tools such as **Visual Studio Code, Cursor** and API testing with **Postman**
- Experienced in project management and team communication using **Jira**, **Slack**, **Confluence**, **Notion**, and **Gather**
- Version control expertise with **GitHub** and **Git**, and time management tools like **Clockify**

Testing & Debugging

- Adept at troubleshooting and resolving complex issues through **Bug Chasing**
- Proficient in mobile app testing using **Android Studio**

Approach to Development and Leadership

I am committed to delivering solutions that not only meet technical requirements but also align with business objectives and user needs. My approach emphasizes:

- **Collaboration:** Encouraging open communication and teamwork to achieve project goals efficiently.
- **Continuous Learning:** Staying updated with the latest technologies and best practices to maintain a competitive edge.
- **Mentorship:** Providing guidance and sharing knowledge to enhance the team's collective expertise.
- **Quality Focus:** Prioritizing robust, scalable, and maintainable code to ensure long-term success.

By combining technical excellence with a focus on team dynamics, I strive to build solutions that make a meaningful impact and foster an environment where everyone can thrive.

2021 February – 2023 January
Johannesburg, South Africa

GotBot, Intermediate Software Developer

Mentoring and training junior developers is a core aspect of my role. I am deeply committed to guiding the next generation of developers, sharing knowledge, and fostering a culture of innovation and continuous learning within the team.

By empowering others, I contribute to the growth of both individuals and the organization as a whole.

In addition to my mentorship capabilities, my expertise spans a comprehensive array of skills, particularly in software and chatbot development, reflecting my versatility and depth in the tech domain:

Development Skills:

- **Programming Languages & Frameworks:** Proficient in JavaScript (Vanilla JavaScript), React.js, React Native, Next.js, Vue.js, HTML, CSS, and Tailwind.css. My experience includes building interactive and user-friendly applications across web and mobile platforms.

- **Chatbot Development:** Extensive experience in developing conversational AI solutions using tools such as **Google DialogFlow**, **ChatGPT**, and **Google Bard**. Skilled in designing natural language processing workflows, integrating chatbots with APIs, and enhancing user engagement through intelligent automation.

- **Cloud & DevOps:** Skilled in AWS services, including AWS Console, AWS API Gateway, and AWS K9S. Experienced in containerization with Docker and working with distributed systems such as OpenSearch and RabbitMQ.

- **API Development:** Expertise in building and consuming RESTful APIs to enable seamless communication between systems.

- **Tools & Platforms:** Proficient in using Android Studio, Visual Studio Code and Postman. Familiar with GitHub and Git for version control.

- **Collaboration & Project Management:** Strong background in tools like Jira, Slack, Confluence and Infobip for team collaboration and task management.

- **Data Management & State Handling:** Experience with Firebase and Redux for efficient data storage and state management in applications.

- **Bug Tracking & Quality Assurance:** Adept at identifying and resolving bugs to ensure robust software solutions.

With this broad skill set, I not only contribute to developing cutting-edge software and chatbot solutions but also ensure their scalability, efficiency, and alignment with user needs.

My passion for innovation and teamwork drives me to continuously enhance my capabilities and empower those I work with.

2018 January – 2021 February

Digileads, Front End Web Developer

In my role, I took on a diverse range of responsibilities that required proficiency in various skills.

These included:

Web Design & WordPress Development:

HTML & CSS:

Graphic/Digital Design:

UI & UX Design:

Server Work (cPanel & KonsoleH):

Website Portfolio

https://digileads.com/
https://woegroup.org/
https://telecoms.adaptit.tech/
https://academy.servelearn.co/
https://jtcbuildings.com/

My skill set encompassed a wide array of competencies:

Graphic Design, Cascading Style Sheets (CSS), WordPress, HTML, Visual Design, Motion Graphics, Microsoft Excel, User Interface Design, Email Marketing, HTML Emails, ActiveCampaign, Jira, Elementor, Git, Github, JavaScript

PROJECTS

2025 January – 2025 May

James Bond, Spy Web App
James Bond must send out a ping via a secure web application. These pings represent messages with coordinate data and can only be viewed by the user who sent them and administrators. James may respond to an existing ping with another, forming a trail of related pings. This was done with React.js, Typescript, Vite, Tailwind and Prisma

2024 – present

Nusuru, Cross Platform Mobile App
Nusuru is a cross-platform mobile application built with React Native and Expo, designed to connect users, service providers, and sellers in a marketplace environment. The app leverages Supabase for backend services, including authentication, real-time data, and notifications.

You can download the android app here

Key Features:
🔐 Secure authentication and user management (with Supabase Auth)
📊 Real-time analytics
🔔 Push notification management and notification templates
🛍️ Product, service, and provider management
⚡ UI with React, TailwindCSS
🛠️ Custom API endpoints and Supabase Edge Functions

2025 May – 2025 May

Time To Price, Cross Platform Mobile App
A modern, cross-platform agricultural cost calculation and market monitoring app built with React Native and Expo. The app helps users calculate break-even prices, track market prices, set price alerts, and manage their farming business more efficiently.

You can download the android mobile app here

You can read the documentation here

Key Features:
🚀 Shortcuts: Quick access to key features like new & past calcs, market prices & analysis.
💰 Cost Calc: Enter costs & yields to get break-even & profit prices per ton.
📈 Market Prices: Live commodity prices & trends.
🔔 Price Alerts: Set alerts & get notified when prices hit your targets.
🧾 Past Calcs: View & manage your calculation history.
📊 Cost Analysis: Gain insights into your farm's costs.
📬 Notifications: In-app & push alerts for price and system updates.
⚙️ Settings: Manage notifications, switch 🇬🇧/🇿🇦 language, and account options.
❓ Help & FAQ: Quick access to support and common questions.
🌐 Languages: English & Afrikaans supported — more coming!
🎨 Modern UI: Clean, mobile-first design with custom components.
